SANIKA DEOKAR

B.E. – Information Technology

Pune, Maharashtra | 8180011549 | deokarsanika814@gmail.com

GitHub: github.com/SanikaDeokar09 | LinkedIn: linkedin.com/in/sanika-deokar-0a8690291

PROFESSIONAL SUMMARY

Full Stack Developer with experience in Python, JavaScript, React, SQL, REST APIs, and web application development. Familiar with Generative AI, RAG systems, semantic search, and LangGraph-based workflows. Interested in software engineering, backend development, and building practical AI-powered applications.

EDUCATION

Pune Vidyarthi Griha's College of Engineering (PVGCOET), Pune **2023 – 2027**
B.E. in Information Technology **CGPA: 8.95**

WORK EXPERIENCE

Full Stack Python Developer Intern – Technoworld Software **Jan 2026 – Mar 2026**

- Developed and maintained web applications using HTML, CSS, JavaScript, React, and Python.
- Debugged application issues, performed testing, and worked with MySQL databases.
- Followed coding standards and software development practices while collaborating on application improvements.

AI Research Intern – PVGCOET, Under Faculty Mentor **Jan 2026 – Mar 2026**

- Analyzed 20+ research papers on RAG systems and hallucination detection techniques.
- Worked with Python, Ollama, vector embeddings, and LLMs for AI evaluation.
- Contributed to a research paper on RAG-based hallucination detection and comparative analysis.

TECHNICAL SKILLS

Programming	Python, Java, C++, JavaScript, SQL
AI / Generative AI	Machine Learning, LLMs, RAG, NLP, Vector Embeddings, LangGraph, Gemini API
Data Science	NumPy, Pandas, Scikit-learn, EDA, Classification, Clustering
Web Development	HTML5, CSS3, Bootstrap, React.js, Streamlit
Backend & APIs	Node.js, Express.js, FastAPI, REST APIs, JWT
Databases	MySQL, MongoDB, SQLite
Tools & Testing	Git, GitHub, VS Code, Postman, Ollama, Pytest, Pydantic
Visualization	Matplotlib, Seaborn
Soft Skills	Problem-Solving, Analytical Thinking, Communication, Team Collaboration

PROJECTS

AI Cyber Threat Detection & Incident Management **Ongoing**

- Developing a platform to detect security threats across emails, system logs, and network traffic.
- Exploring multi-agent AI, RAG, and knowledge graphs for threat correlation, risk analysis, and incident reporting.

AI Resume Analyzer

- Built an AI-powered platform for resume parsing, semantic job matching, and ATS compatibility evaluation.
- Implemented semantic matching and automated resume improvement suggestions using NLP techniques.

ResolveAI – Intelligent Refund Resolution Workflow

- Developed a Python and LangGraph workflow for order verification, refund eligibility, and fraud-risk assessment.
- Implemented mock tools, human approval workflows, SQLite checkpointing, and a Streamlit dashboard with tests.

Tripora – AI-Powered India Trip Planner **Ongoing**

- Developing a travel platform with a React frontend and Python backend for Indian destination discovery and trip planning.
- Working on user authentication, REST APIs, and database integration; AI itinerary generation is planned.

ProdEase – AI Productivity & Stress Tracker

- Built a productivity-tracking platform with authentication and dashboards for daily task monitoring.
- Implemented productivity analytics and visualizations to summarize task completion and work patterns.

ACADEMIC & CAREER HIGHLIGHTS

Areas of Interest: Generative AI, Agentic AI, Machine Learning, Full-Stack Development, Backend Engineering, NLP, and Intelligent Applications.
